MICROSOFT CERTIFICATIONS

The Microsoft Azure Fundamentals: trains you on the process of implementing the Microsoft Azure infrastructure and creating services such as App Service, Virtual Machines, HDInsights, API Management, and StorSimple.

Exam AZ-900.

Designing and Implementing Microsoft DevOps solutions: Microsoft certified Azure DevOps professionals combine people, process, and technologies to continuously deliver valuable products and services that meet end user needs and business objectives.

Professionals can earn this certification either taking the Azure Administrator Associate or Azure Developer Associate certification and pass the AZ-400 exam.

Audience: Planning DevOps projects **Exam AZ-400.**

Microsoft Azure Administrator: enables you to implement, manage, and monitor identity, governance, storage, compute, and virtual networks in a cloud environment. Upon completion of this course students will be able to manage their Azure subscriptions, secure identities, administer the infrastructure, configure virtual networking, connect Azure and on-premises sites, manage network traffic, implement storage solutions, create and scale virtual machines, implement web apps and containers, back up and share data, and monitor your solution.

Exam: AZ-104 is replacing AZ – 103

Developing Solutions for Microsoft Azure: shows designers how to make start to finish arrangements in Microsoft Azure. Understudies will figure out how to actualize Azure register arrangements, make Azure Functions, execute and oversee web applications, create arrangements using Azure stockpiling, execute confirmation and approval, and secure their answers by utilizing KeyVault and Managed Identities. Understudies will likewise figure out how to associate with and expend Azure administrations and outsider administrations, and incorporate occasion and message-based models in their answers. The course additionally covers observing, investigating, and advancing Azure arrangements.

Audience: Developers **Exam AZ-204**

Planning and Administering SharePoint 2016: will provide you with the knowledge and skills to plan and administer a Microsoft SharePoint 2016 environment. The course teaches you how to deploy, administer, and troubleshoot your SharePoint environment. This course also provides guidelines, best practices, and considerations that help you optimize your SharePoint deployment.

This is the first in a sequence of two courses for IT professionals and is aligned with the SharePoint 2016 IT Pro certification.

Exam: 70-339

POWER BI: Unify data from multiple sources to create interactive, immersive dashboard and reports that provide actionable insights and drive business results.
